

**Come work for a privately owned test lab
whose founder's goal was to own a company
where employees are treated the way
he would like to be treated**

We offer a learning environment where teamwork is essential, while still encouraging individual thinking and decision making.

We are searching for entry-level Associates Degree Electronic Technicians (AET) to join our team. Experience with EMI/EMC testing a plus, but not required.

Come join our D.L.S. family.
